

**BOROUGH OF WILMERDING
NOTES FROM MAY 2, 2023 WORKSHOP**

K. MAXWELL: lets discuss the LSA grant. Brad shows the cost to repair Patton Street with a reduced scope as \$40,000.00 and he is investigating other options in case we cannot mill the required amount of concrete.

ENGINEER – B. BRANTHOVER: There is something you can lay down that act as an adhering material. We may not need it but I want to get all the costs together.

K. MAXWELL: Okay so then we would have &60,000.00 left so we would need to choose what else we would want to do. We can do Caldwell from Lydia to Brown or Marguerite from Frank to Clara.

J. THOMAS: I think Marguerite is the worst of all of those.

B. BRANTHOVER: I drove around and agree that Marguerite is the worst.

L. KIRK: Westinghouse has water runoff so why even consider it until that is under control.

K. MAXWELL: the only two that we can consider are Marguerite or the remainder of Caldwell.
