

**BOROUGH OF WILMERDING  
NOTES FROM SEPTEMBER 4, 2018 WORKSHOP**

**ENGINEER - D. GILLILAND:** Demolitions at 401 Orient, 133 Watkins and 70 Morningside are done; he removed the steps on Watkins and separated the porch of 428 Airbrake but has not removed the debris. He still has to remove the trees from Morningside but has started the demo at 652-654 Middle. We will need to apply for CITF funding for the 413 Welsh/Orient slide. Morningside is being paved tomorrow, 9/5/18. Bids open September 11 for the paving of Caldwell Avenue which we split into 2 sections as we will not have enough to do the entire roadway. CD 45 pre application is due. We have the paving and do we want to put in for the sidewalks on Station.

**P. SHURGOT:** yes

**J. THOMAS:** so you don't think the \$60,000 that we received will be enough to do the entire road?

**D. GILLILAND:** it might but I'm not sure.

**P. SHURGOT:** I have a question about Orient, the mail won't deliver to her and I understand the garbage company won't go down there also, is there any way we can get a grant or something to rectify this due to these issues.

**D. GILLILAND:** there are not that many grant applications out there for this type of issue. We could apply for CDBG but I don't feel they would accept it and the others are only once a year.

**P. SHURGOT:** the other question I had was the water coming off the hill on Ice Plant, are we going to try to apply with the other areas?

**D. GILLILAND:** We just need to present it at a council meeting in East McKeesport and North Versailles then we can try to apply for something next year.
